This Office Action is in response to the papers filed on April 15, 2004.

Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent 6,781,219 to Bissey.

With respect to independent claim 15, Bissey discloses a semiconductor package (see the entire patent, including the Fig. 1 disclosure, for example) comprising: an integrated circuit chip 12; a metal leadframe 20 to which the integrated circuit is attached, the metal leadframe including a plurality of electrical connection leads 26 made of a pressure deformable resilient material (copper alloy – see column 6, lines 43-47); a package 46 encapsulating the integrated circuit chip and metal leadframe, the plurality of electrical connection leads extending therefrom in a curved shape under a bottom surface thereof.

Claim 15 is thus rejected under 35 U.S.C. 102(e) as being anticipated by Bissey.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent Application Publication 2003/0038361 to Nakamura.

With respect to independent claim 15, Nakamura discloses a semiconductor package (see the entire patent, including the Fig. 1 disclosure, for example) comprising: an integrated circuit chip 1; a metal leadframe 10/4 to which the integrated circuit is attached, the metal leadframe including a plurality of electrical connection leads 4 made of a pressure deformable resilient material (copper – see paragraph [0058]); a package 5 encapsulating the integrated circuit chip and metal leadframe, the plurality of electrical connection leads extending therefrom in a curved shape under a bottom surface thereof.

Art Unit: 2822

Claim 15 is thus rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura.

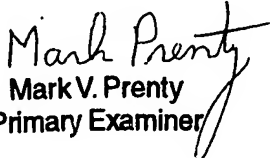

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable over the prior art of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-14, 17 and 18 are allowable over the prior art of record.

The prior art of record does not disclose or suggest the allowable claims taken as a whole.

United States Patent Application Publication 2004/0262704 is related to this application.
